--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

**PERIOD FOR REPLY** [check either a) or b)]

- a) ☒ The period for reply expires 3 months from the mailing date of the final rejection.
- b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. ☐ A Notice of Appeal was filed on \_\_\_\_\_. Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
2. ☒ The proposed amendment(s) will not be entered because:
- (a) ☒ they raise new issues that would require further consideration and/or search (see NOTE below);
- (b) ☐ they raise the issue of new matter (see Note below);
- (c) ☒ they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
- (d) ☐ they present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: See Continuation Sheet.

3. ☐ Applicant's reply has overcome the following rejection(s): \_\_\_\_\_.
4. ☐ Newly proposed or amended claim(s) \_\_\_\_\_ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for reconsideration has been considered but does NOT place the application in condition for allowance because: \_\_\_\_\_.
6. ☐ The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
7. ☒ For purposes of Appeal, the proposed amendment(s) a) ☐ will not be entered or b) ☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: \_\_\_\_\_.

Claim(s) objected to: \_\_\_\_\_.

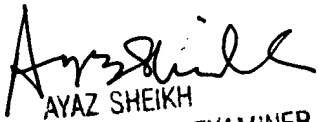

Claim(s) rejected: 1-7, 10-32 and 37-70.

Claim(s) withdrawn from consideration: \_\_\_\_\_.

8. ☐ The drawing correction filed on \_\_\_\_\_ is a) ☐ approved or b) ☐ disapproved by the Examiner.
9. ☐ Note the attached Information Disclosure Statement(s) (PTO-1449) Paper No(s). \_\_\_\_\_.
10. ☐ Other: \_\_\_\_\_

## Continuation of 2. NOTE:

1. The new limitations amended for claim 14 were clearly not present in claims and entry of this language would require reopening of prosecution for additional search / consideration.
2. As per claim 1, Applicant remarks Farber does not teach "a security component to determine whether the replica resource will pose a security risk" and "the security component being configured to determine whether the request will pose a security risk". Examiner notes (a) Farber discloses providing Verify True File mechanism to verify that the data item in a True File registry is indeed the correct "data item" given its "True Name" (Farber: inter alia, Column 31 Line 26 - 33), (b) Farber defines a True Name is computed using a function, MD (Message Digest - equivalent to CRC), to guarantee representing the data block and only data block (Farber: inter alia, Column 12 Line 38 - 43). Thereby, an incorrect (or mismatched) CRC associated with the data item resource is indeed a security risk.
3. Additionally to claim 1 and the rest claims, a copy of provisional application for Brothers (60/224,907) is attached to show the record.
4. Brother teaches a security module "Rights Management Enforcer" performs the following security checks:
  - (a) Rights Management Enforcer entity validates the request for resource is authorized or not (Provisional of Brothers: page 2, 2nd Para).
  - (b) Rights Management Enforcer entity as taught by Brothers (provisional) is responsible for validating a HTTP request that uses a secure URL, determines if the secure URL is properly formatted. Examiner notes "properly formatted" must include (i) qualified characters and (ii) right length. It is also well known URLs typically have a maximum length of two hundred and fifty-six (256) characters. Thereby, each field (arguments) of secure URL, including the resource path as one of parameters / arguments, should not exceed 256 characters; otherwise, it becomes improperly formatted and violates the rule of secure URL as imposed by Rights Management Enforcer entity as taught by Brothers provisional (Provisional of Brothers: page 8, 1st Para).
